MANUFACTURING CORPORATION

# COMPANY BACKGROUND

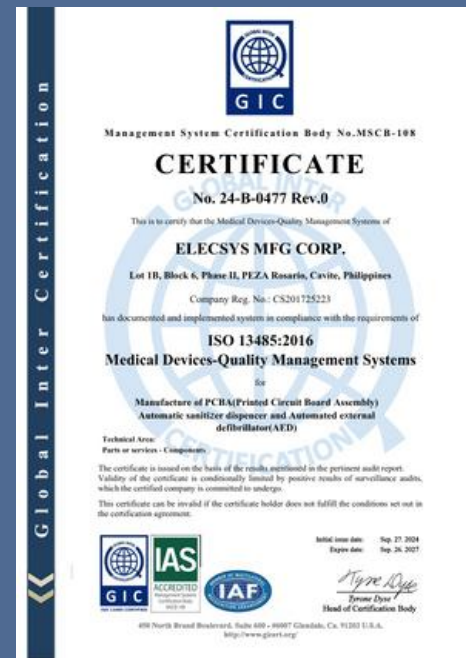

Since its inception, Electronic Systems Manufacturing Corp. (Elecsys Mfg Corp.) has developed an outstanding reputation for customer service, on-time delivery, and the production of high-quality products at highly competitive prices. We provide consignment and turnkey manufacturing solutions for through-hole and surface-mount assemblies, testing to complete box builds.

When you work with Elecsys, we truly collaborate with you. Building strong partnerships with our customers enables us to better meet your individual needs while delivering products that exceed expectations. We offer the skills and expertise of much larger contract manufacturers, combined with the flexibility, service, and attention to detail that set us apart.

We understand that, at times, engineering change orders need to be applied to products already on the production floor or that some rework may be required for various reasons. Elecsys is more than happy to assist in this area, giving our customers every opportunity to achieve their goals.

Our experienced staff, with over 30 years of expertise in manufacturing electronic assemblies, provide assistance in design and manufacturing solutions for new product introduction (NPI), limited pilot production (LPP), and full-scale mass production. We understand that not all customers require high volumes, so we also accommodate low and medium-volume production. Elecsys, as a standard practice, offers recommendations for manufacturing cost reductions. This ensures that all our customers' products are manufactured not only to the highest quality standards but also at the best possible price.

# OUR MISSION

Our mission is to exceed our customer's expectations by providing the highest quality products at the most competitive prices in a timely manner.

# OUR VISION

As a world-class electronic manufacturing company, our vision is not to be the biggest contract manufacturer, but one of the best, with leading-edge technology as a standard—while never forgetting our roots.

# QUALITY AND POLICY

Elecsys Mfg strives to be the best business partner to our customers by providing exceptional products and services without compromising quality. Elecsys staff know that quality is paramount and comes first in the organization. This is achieved by continuously expanding our knowledge of our customer's requirements, products, supply chain, and processes.

## We guarantee our commitment by:

- Continuously training all employees to enhance their skills and knowledge.
- Pursue continuous improvement through Lean principles and essential tools.
- Track Key Performance Indicators (KPIs) through internal audits and reporting.
- Ensure that our policy and process manuals reflect our actual practices.
- Make every staff member part of the quality team, rather than working in isolation.
- Require the same level of commitment from our suppliers. Apply fair trade principles and act ethically, with honesty and integrity.
- Establish processes to deliver products on time and with zero defects to our customers.
- Continuously improve our quality system to meet customer expectations and comply with ISO 9001, IATF and Medical standards.
- Train all staff to exceed our customer's expectations.
